

Not age-dependent  $p>0.001$

Dx age (years)

The graph displays a red line representing the relationship between Dx age (years) and a variable. The line is surrounded by a shaded area indicating the confidence interval. The x-axis ranges from 20 to 80 years, and the y-axis is unlabeled. The text 'Not age-dependent  $p>0.001$ ' is displayed at the top of the plot area.

Not age-dependent  $p>0.001$

Dx age (years)

The graph displays a red line representing the estimated effect, which remains relatively flat across the range of Dx age (years) from 20 to 90. A light brown shaded area indicates the confidence interval, which is wider at the extremes of the age range. Numerous small circles represent individual data points, mostly clustered at the top and bottom of the plot area.
